

There are a number of reasons that I chose Milpark Business School (MBS) to study for my MBA. MBS offers a suitable, frill-free study environment for its students. The design of the MBA study programme is very logical: it starts from the fundamental business concepts and progresses to a higher and deeper level, which helped me to build my knowledge in a proper sequence and make steady progress. Communication between lecturers and students is very open and friendly and assistance is always available where needed.

What I gained from Milpark's MBA programme is not merely a qualification, but most importantly, ability: ability to identify opportunity, to integrate resources, to handle business and to deliver positive results.
